

Little Lambs Home Daycare

Safe Sleep Supervision Policy

Policy

From Ontario regulation 137/15, 33.1 AND 47 (2)

It is the policy of Little Lambs Home Daycare to ensure that:

- Infants' sleep and rest periods are based on their own schedules
- Each toddler and preschool child enrolled is permitted to sleep, rest or engage in quiet activities based on the child's needs.
- children will be assigned to individual cribs or cots in accordance with this Regulation

This policy and its procedures meet the mandatory Ministry of Education requirements regarding sleep and supervision of sleep.

The sleep and rest policy will be:

- Reviewed annually and any time changes are made.
- The policies and procedures relating to sleep supervision must be reviewed with home child care providers, volunteers and students, persons who are ordinarily residents of the premises or regularly at the premises, home child care visitors and employees of the home child care agency, implemented and monitored for compliance and contraventions in accordance with subsection 6.1 of the O.Reg.137/15.

Intent

While not all children need a mid-day nap, young children benefit from periods of quiet relaxation to balance their active play. Some children who are tired may take a relatively long time to relax and sleep, while others only require a short rest period. Children's needs may also change from day to day or week to week.

The need for rest and sleep varies greatly at different ages, and even among children of the same age; however, rest is an important part of the day for all children. This provision allows for a period during which quiet activities are encouraged and children can nap if required.

For children who sleep

Toddlers and preschoolers who regularly sleep have a rest period not exceeding two hours in length.

Monitoring sleeping children reduces the risk of harm/injury as caregivers can look for"

- Signs of distress
- Behaviours during sleep
- Changes in sleep patterns

Safe Sleep Supervision Policy

Special instructions

Sleep and rest time should be of such duration that normal sleep patterns at home are not disrupted.

Programs should take into consideration instructions from parents regarding their children's sleep and rest period. These instructions should be followed as closely as possible but the provider also needs to take into consideration the need of the individual child.

If a parent has provided instructions for the child not to sleep during the day but the child is falling asleep at the table, the provider should provide a rest period for this child. The provider can explain to the parents that the child required a nap that day because the child was unable to stay awake.

Procedure

Upon enrolment and at any time during enrollment

Parents/guardians of children who regularly sleep at the home setting will:

- Be provided with our current Parent Handbook which gives information on our policies regarding sleep and rest. Parent Handbooks are updated and given out yearly.
- Be provided with a place on the application form to indicate their child's specific sleeping arrangements or patterns to be implemented. Application forms are reviewed annually.
- Be provided a bedtime/rest time routine details form completed by the provider if the child is enrolled in extended/overnight hours care. Once signed off by the provider, the parent/guardian and the ECE home visitor, the provider will receive a copy. Any time a provider makes a change to what has been signed off on the original form, the parent/guardian must sign off confirming acceptance of the change. A new form may need to be completed and signed off by all parties if a number of changes are being indicated.
- Have "Child Care Information Change Notices" readily available to allow parents to make any changes to their child's sleep and rest arrangements as their child grows.
- Be shown each child's personal sleep and rest space and anytime there is a change to the arrangement that is agreeable to the parent/guardian.
- Be verbally notified if any significant changes in their child's sleeping patterns or behaviours are observed during sleep to allow adjustments to be made if necessary.
- If using extended/overnight hours, be provided with a bedtime/rest time routine details form to review and sign that indicates information about:

Little Lambs Home Daycare

Safe Sleep Supervision Policy

- The providers typical hours of overnight sleeping when the child will not be observed 100% of the time.
- The use of the electronic monitoring device as a method of overnight supervision and its maintenance.
- Who may be in the home during the extended/overnight period of time and may assist with monitoring sleep disturbances. All sleep disturbances will be directed to the provider.

Providers will be notified when:

- Information is on a child's application form kept in the child's file to read regarding sleep and rest arrangements
- New information on a "Child Care Information Change Notice" is provided by the family regarding a child's sleep arrangements in the child's file.
- An observance of a significant change in the child's sleep patterns during a direct visual check resulted in changes being made, the change is documented in the child's file.

Supervision

Daytime hours:

All children that regularly sleep and rest at the home child care setting will:

- Be monitored by the provider, including direct visual checks four times throughout each two hour sleep and rest period. The number of daytime sleep and rest periods applies to the age and need of the child.
- Be monitored ensuring sufficient light in the sleep/rest area to conduct direct visual checks.
- Have the direct visual checks documented by initial on the sleep monitoring form. The completed sleep monitoring form is submitted with attendance forms to the agency office bi-weekly.
- Have any significant change in sleep pattern or behaviour observed while the provider is conducting the direct visual checks documented on the "sleep monitor" form and communicated to the parent/guardian. Adjustments, if applicable will be documented on the child's application form and the provider will be notified by the ECE home visitor.

Extended/ Overnight hours

Families of children who sleep at the child during the extended/ overnight hours must review and sign the bedtime/res time routine details form when initiated and any time a change is made.

When children sleep at the home during extended/ overnight hours, it is understood that the provider must also acquire sufficient rest and sleep. To that end, electronic sleep monitoring devices will be used to monitor sleeping children during that period. Electronic sleep monitoring

Little Lambs Home Daycare

Safe Sleep Supervision Policy

devices must be checked before each sleep period to make sure they work and replaced immediately if they do not. The equipment checks are noted in the sleep monitoring form provided for extended/ overnight hours.

Any significant change in sleep patterns of behaviour experienced during the extended/ overnight hours is documented in the sleep monitoring form and communicated to the parent/guardian at the earliest convenience.

Adjustments, if applicable will be documented on the child care information change notice and attached to the child's application form. The provider will be notified of changes by the ECE home visitor.

Important!

Electronic sleep monitors cannot be used in place of direct visual checks of sleeping children during daytime sleep and rest periods.

Direct Visual Checks:

Steps when conducting direct visual checks:

1. Fill out the names of the children who are sleeping on the sleep monitoring form along with the date.
2. Look at each child closely for a rise and fall of the chest and or stomach and document the time.
3. Document when any significant changes are observed and communicate the observations to the parent/guardian.
4. Daytime hours: conduct and document visual checks four times throughout each two hour sleep and rest period.
5. Extended/ overnight hours: conduct and document direct visual checks:
 - a. Before going to bed
 - b. Upon awaking during the night
 - c. Anytime a disturbance is heard over the electronic monitoring device.
 - d. When another person is heard over the electronic sleep monitoring device.
 - e. When rising for the day.

POTENTIAL INDICATORS OF DISTRESS:

- CHANGE IN SKIN COLOUR
- CHANGE IN BREATHING
- WHEEZING
- GRUNTING
- NOSE FLARING
- SIGNS OF OVERHEATING- SWEATING

Little Lambs Home Daycare

Safe Sleep Supervision Policy

Safe Sleep:

Children age 0-12 months of age are placed for sleep in a manner consistent with the recommendations set out in the most current version of the "Joint Statement on Safe Sleep: preventing SIDS in Canada (attached), a document endorsed by Health Canada. Requirements relating to sleep positions may only be waived if a medical doctor advises a different position in writing. The recommendation must be submitted to Little Lambs Home Daycare.

Additional information:

As discussed in How Does Learning Happen, children's well-being is supported when adults respect and find ways to support each child's varied physiological and biological rhythms and needs for active play, rest and quiet time.

Finding ways to reduce stress through providing space and time for rest and quiet play based on individual differences helps children become increasingly aware of their own basic needs and supports their developing self-regulation skills.

Our program makes every effort to organize time, space and materials to support the children's varied needs for sleep, rest and quiet time.

MODIFICATIONS TO THIS OR OTHER POLICIES

Any policy that does not respect and promote dignity, independence, integration and equal opportunity of people with disabilities will be modified or removed. Our policies are maintained and updated as required to reflect our practices, employees and best serve our community.
